

Ramses

We are Ramses: the operating system for Africa and the Middle East

Ramses

Ramses is the operating system for Africa and the Middle East

This is Ramses

THE EVERYTHING APP

Ramses integrates hundreds of essential services — marketplaces, payments, food delivery, e-commerce, ride-sharing — into one seamless platform for Africa and Middle East users..

DIGITAL BRIDGE

We connect businesses to millions while offering users a mobile marketplace — simplifying discovery, comparison, and transactions through one intelligent app..

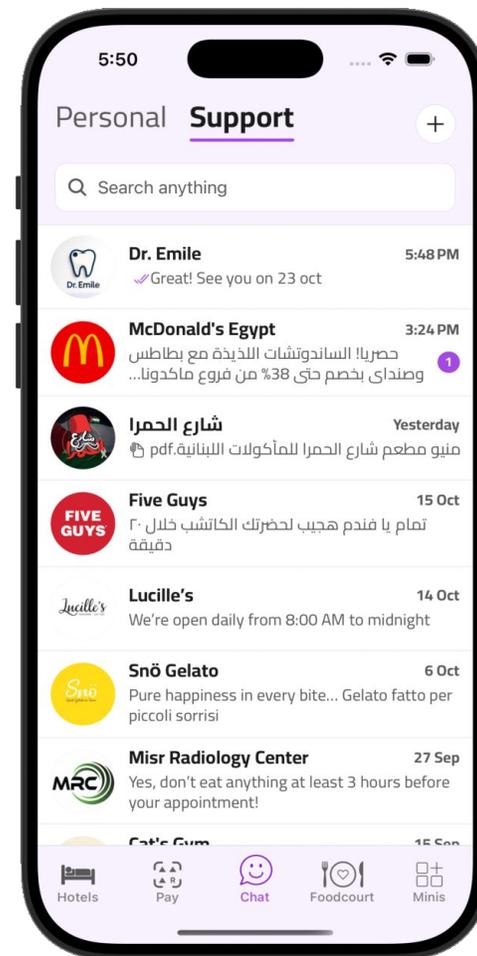

SPEAKING YOUR LANGUAGE

Ramses will support 80 languages by the end of 2025 and 500+ by December 2026, ensuring true digital inclusion for everyone.

Ramses.Chat

In our superapp, the chat serves as the central interface connecting users to the many businesses within our marketplaces. It's the core experience, simplifying how people interact, transact, and manage their daily needs.

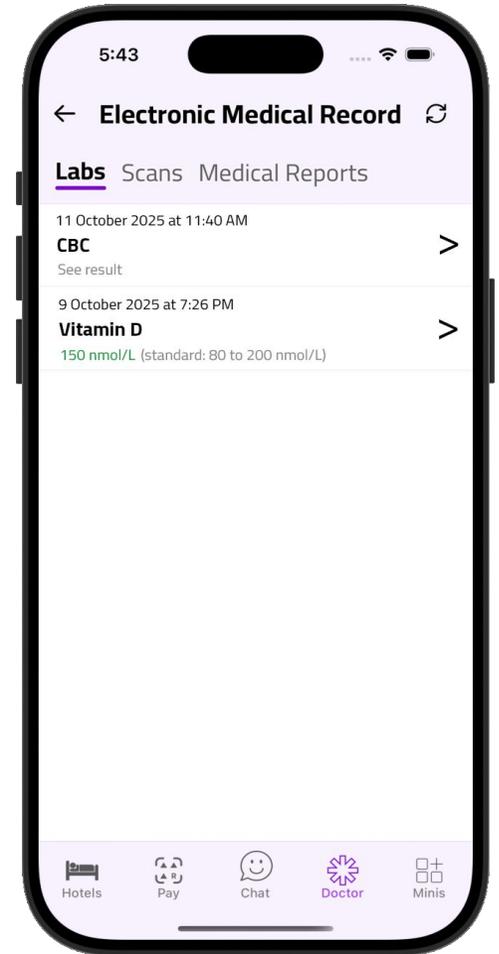

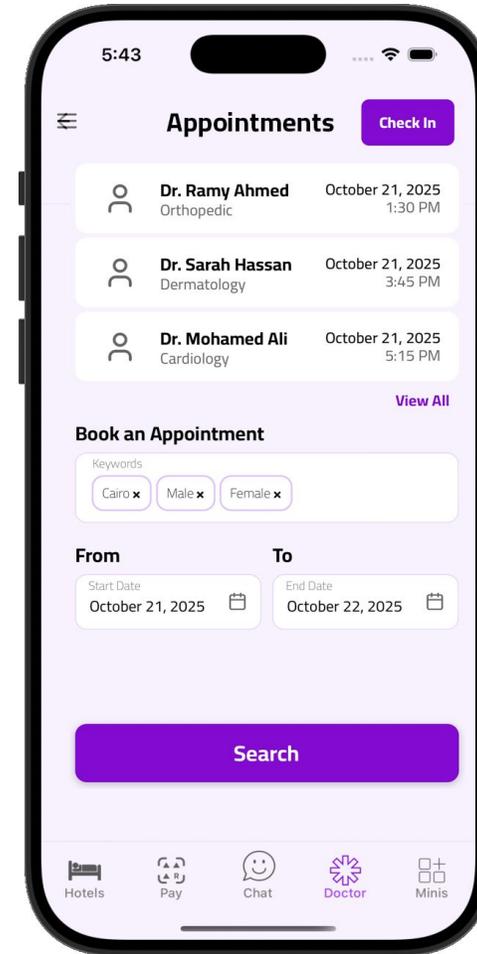

Through chat, users can speak directly with their doctor, clarify order details with restaurants before delivery, raise complaints, or request support. Ramses.Chat is one seamless, conversational flow that keeps everything effortless and connected.

Ramses.Doctor

This is a healthcare marketplace for Africa and the Middle East where users search, book appointments with providers, and access in-clinic, home, or teleconsultation services, plus lab tests and medication delivery.

Our app uses AI to convert consultation audio into EMRs, stores records on patients' devices with consent-based provider access, and translates medical records into multiple languages for seamless cross-border healthcare.

Ramses.Hotels

Our app connects travelers in Africa and the Middle East with hotels and vacation rentals. Users search, compare properties with reviews and transparent pricing, then book securely using multiple payment options.

Earn automatic cashback on bookings, credited to your Ramses.Pay account for future use. Access curated local activities, tours, and experiences at your destination, with integrated booking and payment for seamless travel planning.
